Fortnite Minecraft Steam Overwatch Destiny 2 Mordhau Origin Client Blizzard Battle. Net Desktop App Halo: Combat Evolved Age of Empires II HD Age of Empires III Minecraft Pokemon GO Alto's Adventure Hearthstone Terraria Catan Classic Roblox VeThor What is a hacked client? A hacked client? A hacked client is a version of Minecraft that can be played on any server that allows you to add extra modifications to the game that improve your gaming experience. Hacked Clients are not allowed/banned on most Minecraft servers and you will most likely be banned if you use one. Hacked Clients can improve your PVP Experience, building, movement and even world rendering. They allow you to do actions that a player on the normal version of Minecraft Servers. It allows players to hit players/animals/mobs when the player isn't even looking at them. Category: Combat AntiKnockback - AntiKnockback is where when you are hit by a player, a snowball or even a TNT explosion, your player will not move. Category: Movement NoSlowDown - When you are hit by an egg or a bow etc, you stop sprinting and must press CNTRL+W to start sprinting again. With NoSlowDown, you can bypass this. Category: Movement NoSlowDown can stop you from: Slowing down when blocking with a sword Slowing by simply hitting them from the ground normally. Category: Combat Flight - Fly around the server, easily detected. Category: Movement Bunnyhop/B-Hop - This is a very weird looking hack to use, and it is one of the most detectable hacks. B-Hopping allows you to basically jump very far. Kind of a flying tool. Category: Movement Reach - Allows you to hit players/entities from a far distance Category: Combat Speed - Walk/Move very guickly. (This can be VERY buggy) Category: Movement Other Hacks Aimbot - When drawing back with a bow, you will be almost on point. Category: Combat Annoy - You can select a player and whatever they send in chat, you will repeat Category: Chat/Fun AutoArmor - Automatically equips your armour for you. Category: Player/Defence AutoDisconnect - When hitting a player, you will automatically be logged out the server. Category: Misc AutoFish - Automatically pull your rod back when a fish is caught Category: Misc AutoSoup - Automatically drink soup when on a set health (Used on KitPvp servers. Category: Misc AutoSteal - When opening a chest, you will automatically receive all of its contents. (Useful for Survival Games or Skywars) Category: Player AutoSwitch - Switches to each of your best tool for the job you contents. (Useful for Survival Games or Skywars) Category: Fun AutoSword - Automatically bring out your best tool for the job you are doing. Category: Combat AutoWalk - Automatically walk in the direction you are facing. Category: Movement AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for being AFK for too long (AFK = Away From Keyboard) Category: Movement AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for being AFK for too long (AFK = Away From Keyboard) Category: Movement AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for being AFK for too long (AFK = Away From Keyboard) Category: Movement AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for being AFK for too long (AFK = Away From Keyboard) Category: Movement AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for being AFK for too long (AFK = Away From Keyboard) Category: Movement AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for bei Prevents you from slipping on ice to make it easier to walk on Category: Protection/Player AntiPotion - Allows you to not be affected by Potion Effects. Category: Protection/Player AntiSpam - Protects you from cactus Category: Protection/Player AntiPotion - Allows you to not be affected by Potion Effects. Category: Protection/Player AntiPotion - Protects you from cactus Category: Protection/Player AntiPotion - Protection/Player - Protection/P chat spam by deleting duplicate messages. Category: Chat BaseFinder - Just like an X-Ray, but it highlights all of the blocks that are placed by a player, and not naturally placed. Category: Render Blink - When activating blink, you will come out of your body to roam freely around the map. When pressing the blink button again, your original body will be teleported to your ghost body. This is useful for Survival Games where you can run and loot the chests before the game starts, then blink and teleport to your footsteps to show where you have been walking. Category: Render Backstep - Let's vou walk backwards the same speed vou walk fowards. Category: Movement CaveFinder - Automatically finds caves and ravines for you. Category: Render Day - Makes it always day Category: World Render Dolan Speech/Fancy Chat -Whenever you send a chat message, the characters will appear as UTF Category: Misc/Chat ElytraSpeed - Allows you to fly faster on an Elytra (Requires Minecraft Version 1.9+) Category: Movement FastBuild - When trying to build a long bridge, FastBuild makes it a lot easier by making it so you never fall off of a block! Category: Building FastPlace Build very quickly. Category: Building FreeMove - Stops a Minecraft server like MP from forcing your head in a certain directiom Category: Movement FastFall - Fall very quickly from a height. Category: Movement Follow - Follow a player wherever they go. Category: Movement Follow - Follow a player wherever they go. Category: Movement FastFall - Fall very quickly from a height. to fly/wander around within their render distance without actually moving or being known that they are there. Sadly, this is un-patchable as it is all client sided. This in conjunction to cave finder helps hackers find bases Category: Player Fullbright - When activated, gives yourself a permanent night vision. Category: Render FastLadder - Climb up ladders very quickly Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around and attack everything! Category: Movement FightBot - Automatically walk around a fight of the fi containers/interact with the environment through blocks. Category: Fun HealthTags - Allows you to view how much health a player/entity/mob has next to its username. Category: Render HighJump - Basically, gives you permanent jump boost. (Can be quite buggy.) Category: Misc ItemESP - Allows you to view dropped items/entities on the floor Category: Render Invincibility (a.k.a GodMode) - Makes you invisible to other players if you die and respawn near them. Only works on vanilla servers. Category: Player Insult - Say random insults in the chat to annoy people. Category: Player Insult - Say random insults in the chat to annoy people. Category: Player Insult - Say random insults in the chat to annoy people. Movement Jetpack - When you hold space, you will fly into the air. Category: Movement Liquids - Allows you to interact with liquid blocks. Category: Movement MileyCyrus - Sneak every second, makes it look like you are twerking. Category: Movement/Fun MultiAura - Allows you to hit multiple entities at once. Category: Combat MassTPA - Send a /tpa request to everyone on the server. Category: Fun MiddleClickFriends - When middle clicking on a player, they will be added to your "friends list". This means your KillAura/MultiAura etc will be ignored on them. Category: Fun NameTags - All player Name tags/holograms will appear Much bigger. Category: Render Nuker - Basically an auto-block breaker, but breaks blocks at a faster rate. Category: Player NoFlinch - Stops your Minecraft Screen from shaking when being damaged Category: Player NoHurtCam -Disables the annoying effect when you get hurt. Category: Render NoWeb - Kind of like a NoSlowDown but makes you not get slowed down when travelling through cobwebs. Category: Render ProphuntESP - For MP users, this hack will be useful. It allows you to locate disguised players. Category: Render PluginFinder - Automatically finds the plugins used on a Minecraft Server - Some servers block it with AntiCheat Category: Movement Panic - When this hack is executed, all of your Hacks will be turned off. Category: Misc PlayerESP/MobESP/AnimalESP - Shows coloured boxes around mobs/players to locate them easier. Category: Render Regen - Basically regenerates your health very quickly, with most clients, this only works when your hunger is full, and can be VERY buggy and can sometimes kick you from the server. Category: Player Respawn/Auto-Respawn - Makes you instantly respawn instead of seeing the death screen. Category: Player RemoteView - Allows you to see the world as someone else. Category: Movement/Fun/Misc SafeWalk - Stops you from walking of blocks when building a bridge or a building. Category: Movement Sneak - Keep sneaking without having to keep holding the Shift Key. Category: Movement SpeedMine - Mine faster. This can be very buggy on most servers with an AntiCheat system. Category: Building Spider - Gives you the ability to climb walls. Category: Movement Sprint - Sprint by simply holding down the W button. (This can also be a Mod, that Mod is allowed on Hypixel and most other servers) Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having to press space Category: Movement Step - Automatically jump up blocks without having the press space Category: Movement Step - Automatically jump up blocks without having the press space Category: Movement Step - Automatically jump up blocks without having the press space Category: Movement Step - Automatically jump up blocks without having the press space Category: Movement Step - Automatically jump up blocks without having the press space Category: Movement Step - Automatically jump up blocks without having the press space Category: Movement Step - Automatically jump up blocks without having the press space Category with the press space time, bow shots etc. Category: Movement Teleport - Block with your sword and teleport to the location you're looking at. Category: Movement TP-Aura - Teleport around your target while hitting them. This hack is VERY noticeable and can be detected super easily. Category: Movement Teleport around your target while hitting them. This hack is VERY noticeable and can be detected super easily. Category: Movement TP-Aura - Teleport around your target while hitting them. This hack is VERY noticeable and can be detected super easily. looking at. Category: Combat Tracers - Draws a line pointing to the nearest player/entity/mob. Category: Render V-Clip - The short name for Vertical clipping. It is basically like a NoClip but only on the Y axis. This worked for quite some time on Bukkit server without NC+ but is since patched by both NC+ and the Bukkit server without NC+ but is since patched by both NC+ and the Bukkit server itself, setting an alert off that a player made an illegal movement. This hack used to be used to clip into people's bases, steal their items, and leave Category: Movement/Render WorldDownloaded (Also a Mod) - Can be used to Download the World you are currently on to your Singleplayer Worlds Category: Render X-Ray - Find certain blocks like Diamond Ore, Obsidian and more underground (mostly used on Factions Servers) Category: Render Are there some I have missed? Post them in the comments below and rate this thread "Informative or Useful or Like" if you found it useful! Last edited: Mar 27, 2017 sykeseguy Saying hack clients by name is not allowed. Chandoggie Hypixel Zoo ZOO GUILDMASTER I love how every hack you listed is in Wurst and there are so much more you need to cover. it's a start tho VeThor Exactly Imao. I love people that think they know stuff it's hilarious Did I say I thought I was clever? Nope . Some people don't know what these are, this thread is purely to help them people out! I'm not trying to "act clever"... WhyMinecraft I can tell you when you show me where it says Public Shaming and Necroposting are rules. By that logic this should be removed. Spoiler: Copy Pasted from Report RuleBreakers The Art of Catching Hackers What is legit and what isn't on the Hypixel Server Back to index --- Part I - Hacks Most Common Hacks : All those hacks are found very often on the server, we'll only list those we can find, for example Regen Hack is now blocked, therefore we won't talk about it. Apparently hack names change sometimes, but we'll call them by their most common name. PvP Hacks: Aimbot: ForceField / Kill Aura: Autoclick/Macros: No Knockback: Other Hacks: Fly: Glide and Spider: Speed: Rarer hacks: Critical: Nuker: Fast Placing: Fast Breaking: Bow Aimbot: Chest Finder/Trackers/Xray: No blindness: Auto Tool: Also just a reminder that it is not possible to have more than one font in Minecraft, so if you see a screenshot of someone with different fonts in his chat and the game scoreboard, he is using a hacked client. ---- Part II - The Games In this section we will list all the games of the server and see what can be done and what can't. MegaWalls: TNT Games: Quake: Blitz: VampireZ: PaintBall: Aread. Nope, I didn't pay anyone to make this thread myself to help players that are not sure on what these hacks are. I'm not trying to participate in any competition. sykeseguy By that logic this should be removed Spoiler: Copy Pasted from Report RuleBreakers The Art of Catching Hackers What is legit and what isn't on the Hypixel Server Back to index -----very often on the server, we'll only list those we can find, for example Regen Hack is now blocked, therefore we won't talk about it. Part II - The Games In this section we will list all the games of the server and see what can be done and what can't. MegaWalls: TNT Games: Quake: Blitz: VampireZ: PaintBall: Arena: The Walls: Arcade: The issue is that guide doesn't really say any specific names, while this thread lists all of the specific names. Nope, I didn't pay anyone to make this thread, haha. I made this thread myself to help players that are not sure on what these hacks are. I'm not trying to participate in any competition. You don't know what Hacked Clients/Hacks are to tell them a list of them. I don't want any hate in these comments, even if this has already been posted in a different thread, I'm sure a little extra information is always appreciated. Please, can we all stop hating or disagreeing with one another and just appreciated that this thread is purely only to players. I am not trying to be the best by posting this, I just want players to know what the hacks are so they can report hackers using /wdr in game. I just want the Hypixel Community to be informed, not puzzled. Types of Kill aura, Multi aura, Tp aura, I think maybe reach arua, mob aura. And for aim bot and No blind thoseare pretty self explanatory i cant think of a way to edit those. Types of Kill aura: Kill aura, Multi aura, Tp aura, I think maybe reach arua, mob aura. And for aim bot and No blind thoseare pretty self explanatory i cant think of a way to edit those. ok. I was just mainly confused on why there would be more types of no blindness... Page 3 ArcOfSky This was actually an exact replica I made on hacks awhile back, and seems that it is quite similar However, it is now lost forever in the forums so this is a great way to bring it back. My last had nearly 100 hacks, so there are several you missed Yeah and you also did the same thing as this guy, you gave wrong definitions of some hacks, and listed the most useless ones. It's a good thing your thread is down the drain. joshua123 4 Orangemarshall's mod does this, and it's allowed 1.9(?) and above has an option for this there are resource packs as well this can be done with macros or with "sticky" keys or something. happens to me once in a while turning gamma all the way up through options.txt is allowed Uses of many hacks can be triggered without actually hacking. Clients are just an easier way for people to do them. What is a hacked client? A hacked client is a version of Minecraft that can be played on any server that allows you to add extra modifications to the game that improve your gaming experience. Hacked Clients are not allowed/banned on most Minecraft servers and you will most likely be banned if you use one. Hacked Clients can improve your PVP Experience, building, movement and even world rendering. They allow you to do actions that a player on the normal version of Minecraft Servers. It allows players to hit players/animals/mobs when the player isn't even looking at them. AntiKnockback - AntiKnockback is where when you are hit by a player, a snowball or even a TNT explosion, your player will not move. NoSlowDown - When you are hit by an egg or a bow etc, you stop sprinting and must press CNTRL+W to start sprinting and must press CNTRL+W to start sprinting again. With NoSlowDown, you can bypass this. NoSlowDown etc., you stop sprinting and must press CNTRL+W to start sprinting again. down through cobwebs Walking through Lava/Water very slowly Slowing down when blocking with a sword Slowing down when drawing back a bow. When hit, you will carry on sprinting Walking slowly on SoulSand and more... Criticals - This is a very popular hack where you can deal a critical hit on a player by simply hitting them from the ground normally. Flight - Fly around the server, easily detected. Bunnyhop/B-Hop - This is a very weird looking hack to use, and it is one of the most detectable hacks. B-Hopping allows you to basically jump very far. Kind of a flying tool. Reach - Allows you to hit players/entities from a far distance Speed - Walk/Move very quickly. (This can be VERY buggy) Aimbot - When drawing back with a bow, you will be located to the nearest player, and your accuracy will be almost on point. Dolan Speech/Fancy Chat - Whenever you send a chat message, the characters will appear as UTF AntiBlind - Bypasses the Blindness Potion effect FastBuild - When trying to build a long bridge, FastBuild makes it a lot easier by making it so you never fall off of a block! Sneak - Keep sneaking without having to keep holding the Shift Key SpeedMine - Mine faster, can be very buggy on most servers with AntiCheat FastPlace - Build very quickly. Freecam - This acts as an "out of body experience" allowing the player to fly/wander around within their render distance without actually moving or being known that they are there. Sadly, this is un-patchable as it is all client sided. This in conjunction to cave finder helps hackers find bases V-Clip - The short name for Vertical clipping. It is basically like a NoClip but only on the Y axis. This worked for quite some time on Bukkit servers without NC+ but is since patched by both NC+ and the Bukkit server itself, setting an alert off that a player made an illegal movement. This hack used to be used to clip into people's bases, steal their items, and leave. Regen - Basically regenerates your health very quickly, with most clients, this only works when your hunger is full, and can be VERY buggy. Sprint - Sprint by simply holding down the W button. Nuker - Basically an auto-block breaker, but breaks blocks at a faster rate. Glide - When falling, you will fall very, very slowly. NoFall - When you hit the ground from a great height, you will fall very, very slowly. NoFall - When falling, you will not be damaged. Impossible Inventory without opening it. AutoSoup - Automatically drink soup when on a set health (Used on KitPvp servers) \*\*\*\*\*\*/Derp - Make your head appear as it's moving around constantly. FastEat - Eat your food very quickly, quite self-explanatory. Panic - When this hack is executed, all of your Hacks will be turned off. PlayerESP/MobESP/AnimalESP - Shows coloured boxes around mobs/players to locate them easier. NoWeb - Kind of like a NoSlowDown but makes you not get slowed down when travelling through cobwebs AutoBlock - When hitting a player, you will automatically jump up blocks without having to press space ProphuntESP - For MP users, this hack will be useful. It allows you to not be affected by Potion Effects. AutoSteal - When opening a chest, you will automatically receive all of its contents. (Useful for Survival Games or Skywars) TP-Aura - Teleport around your target while hitting them. This hack is VERY noticeable and can be detected super easily. AntiFire - Stops you from being burnt AntiCactus - Prevents damage from catcus AutoArmor - Automatically equips your armour for you. FastLadder - Climb up ladders very quickly X-Ray - Find certain blocks like Diamond Ore, Obsidian and more underground (mostly used on Factions Servers) Jetpack - When you hold space, you will fly into the air. AutoWalk - Automatically walk in the direction you are facing. Triggerbot - Automatically attacks whatever you are looking at. NameTags - All player Name tags/holograms will appear Much bigger. Follow - Follow a player wherever they go. Headless - Glitch out your players head and make it appear as you have not got a head. MileyCyrus - Sneak every second, makes it look like you are twerking a player. AutoTool - Automatically bring out your best tool for the job you are doing. AntiAFK - Walk around a 3x3 area to stop yourself from being kicked for being AFK for too long (AFK = Away From Keyboard) GhostHand - Hit entities through blocks or open containers/interact with the environment through blocks. Jesus - Allows you to walk on water and lava. Can be very buggy on some AntiCheat servers. Tracers - Draws a line pointing to the nearest player/entity/mob. Trajectories - Allows you to view where your egg/snowball/bow shot will land before throwing it. MultiAura - Allows you to hit multiple entities at once. AutoSwitch - Switches to each of your slot bars every 0.5 seconds, like to slot bar 1, then 2, then 3 etc etc The ".legit" bypass - Sometimes, you may be asked to say ".legit" in chat to see if you are hacking or not. To easily bypass this, there is a hack called "Say", where you say type in chat ".say .legit" and your message will be ".legit"! Breadcrumbs - Draws a coloured line behind all of your footsteps to show where you have been walking. MiddleClickFriends - When middle clicking on a player, they will be added to your "friends list". This means your KillAura/MultiAura etc will be ignored on them. FastFall - Fall very quickly from a height. Timer - Make all of your movements quicker such as Arm Movements, player time, bow shots etc. Spider - Gives you the ability to climb walls. CaveFinder - Automatically finds caves and ravines for you. BaseFinder - Just like an X-Ray, but it highlights all of the blocks that are placed by a player, and not naturally placed. HighJump - Basically gives you permanent jump boost. (Can be quite buggy.) FullBright - When activated, gives yourself a permanent night vision. AutoDisconnect - When you are on a set health level, you will automatically be logged out the server. ItemESP - Allows you to view dropped items/entities on the floor NoSwing - Allows your arm to not move when hitting a player or placing a block. Day - Makes it always day AutoMine - Allows you to break any block you look at. Liquids - Allows you to interact with liquid blocks. MassTPA - Send a /tpa request to everyone on the server. NoHurtCam - Disables the annoying effect when you get hurt. Phase -Exploits a bug in NoCheat+ that allows you to glitch through blocks. RemoteView - Allows you to see the world as someone else. Overlay - Renders the Nuker animation when you mine a block. Invincibility (a.k.a GodMode) - Makes you invisible to other players if you die and respawn near them. Only works on vanilla servers. HealthTags - Allows you to view how much health a player/entity/mob has next to its username. AntiSpam - Protects you from chat spam by deleting duplicate messages. FightBot - Automatically walk around and attack everything! Are there some I have missed? Post them in the comments below and rate this thread "Like" if you found it useful! You say that some are "easily detected," any suggestions? Thats wurst feature list RyanDru I actually like this thread as it informs new players of hacks that could help players better detect hacks in the future.
