[177] A few months after becoming Prime Minister Blair paid tribute to Diana, Princess of Wales, in the morning of her death in August 1997, in which she described her famously as "the People's Princess".[178][179] After assuming office in 1997, Blair gave special importance to his press secretary, who became the official spokesman for the Prime Minister (the two roles have been separated). Blair had been a major advocate for a ground offensive, which Bill Clinton was reluctant to do, and ordered that 50,000 soldiers ¢ÅÅÅ most of the available British Army ¢ÅÅÅ should be made ready for action.[66] The following year, the limited Operation Palliser in Sierra Leone swiftly swung the tide against the rebel forces; before deployment, the United Nations Mission in Sierra Leone had been on the verge of collapse.[67] Palliser had been intended as an evacuation mission but Brigadier David Richards was able to convince Blair to allow him to expand the role; at the time, Richards' action was not known and Blair was assumed to be behind it.[68] Blair ordered Operation Barras, a highly successful SAS/Parachute Regiment strike to rescue hostages from a Sierra Leone rebel group.[69] Journalist Andrew Marr has argued that the success of ground attacks, real and threatened, over air strikes alone was influential on how Blair planned the Iraq War, and that the success of the first three wars Blair fought "played to his sense of himself as a moral war leader".[70] When asked in 2010 if the success of Palliser may have "embolden[ed] British politicians" to think of military action as a policy option, General Sir David Richards admitted there "might be something in that".[68] Blair and US president George W.
