Jquery ui autocomplete combobox. Kendo combobox autocomplete jquery. Jquery autocomplete combobox large list. Jquery autocomplete combobox select event example. Jquery ui autocomplete combobox ajax example. Implement jquery autocomplete dropdown (combobox) in asp.net. Jquery combobox autocomplete example. Javascript combobox autocomplete jquery.

根据用户输入值进行搜索和过滤，让用户快速找到并从预设值列表中选择。如需了解更多有关 autocomplete 部件的细节，请查看 API 文档 自动完成部件 (Autocomplete Widget)。 本章节使用到 search.php 下载。默认功能 当您在输入域中输入时，自动完成 (Autocomplete) 部件提供相应的建议。在本实例中，提供了编程语言的选项，您可以输入 "ja" 尝试一下，可以得到 Java 或 JavaScript。数据源是一个简单的 JavaScript 数组，使用 source 选项提供给部件。jQuery UI 自动完成 (Autocomplete) - 默认功能 (function) { var names = ["John Zaeferrer", "Scott González", "John Resig"]; var accentMap = { "á": "a", "â": "a", "ó": "o" }; var normalize = function(term) { var ret = ""; for (var i = 0; i < term.length; i++) { ret += accentMap[term.charAt(i)] || term.charAt(i); } return ret; }; \$ ("#developer").autocomplete({ source: function(request, response) { var matcher = new RegExp(\$.ui.autocomplete.escapeRegex(request.term), "i"); response(\$.grep(names, function(value) { value = value.label || value.value || value; return matcher.test(normalize(value)); })); } }); // 开发人员: 分类 分类的搜索结果。尝试输入 "a" 或 "n"。jQuery UI 自动完成 (Autocomplete) - 分类 custom-combobox (position: relative; display: inline-block; } custom-combobox-toggle { position: absolute; top: 0; bottom: 0; margin-left: -1px; padding: 0; /* 支持: IE7 */ *height: 1.7em; *top: 0.1em; } custom-combobox-input { margin: 0; padding: 0.3em; } (function(\$) { \$.widget("custom.combobox", { create: function() { this.wrapper = \$("").addClass("custom-combobox").insertAfter(this.element); this._createAutocomplete(); this._createShowAllButton(); }, _createAutocomplete: function() { var selected = this.element.children("selected").value || selected.val() ? selected.text() : ""; this.input = \$("").appendTo(this.wrapper) .val(value) .attr("title", "") .addClass("custom-combobox-input ui-widget ui-widget-content ui-state-default ui-corner-left") .autocomplete({ delay: 0, minLength: 0, source: \$.proxy(this, "source") }); tooltip({ tooltipClass: "ui-state-highlight" }); this._on(this.input, { autocompleteselect: function(event, ui) { (ui.item.option.selected = true; this.trigger("select", event, { item: ui.item.option }); autocompletechange: "removeIfInvalid" }); createShowAllButton: function() { var input = this.input, wasOpen = false; \$("").attr("tabindex", -1).attr("title", "Show All Items").tooltip() .appendTo(this.wrapper).button({ primary: "ui-icon-triangle-1-s", text: false }).removeClass("ui-corner-all").addClass("custom-combobox-toggle ui-corner-right").mousedowned(function() { wasOpen = input.autocomplete("widget").is("visible"); }).click(function() { input.focus(); // 如果已经可见则关闭 if (wasOpen) { return; } // 传递空字符串作为搜索的值，显示所有的结果 input.autocomplete("search", ""); }, source: function(request, response) { var matcher = new RegExp(\$.ui.autocomplete.escapeRegex(request.term), "i"); response(this.element.children("option").map(function() { var text = \$(this).text(); if (this.value && (request.term || matcher.test(text))) return { label: text, value: text, option: this }; })); }, _removeIfInvalid: function(event, ui) { // 选择一项，不执行其他动作 if (ui.item) { return; } // 搜索一个匹配 (不区分大小写) var value = this.input.val(), valueLowerCase = value.toLowerCase(), valid = false; this.input.tooltip("close").attr("title", ""); }, 2500; this.input.data("ui-autocomplete", { term: "" }); destroy: function() { this.wrapper.remove(); this.element.show(); } }); })(jQuery); \$(function() { \$("#combobox").click(function() { \$("#combobox").toggle(); }); // 您喜欢的编程语言: 请选择... ActionScript AppleScript Asp BASIC C C++ Clojure COBOL ColdFusion Erlang Fortran Groovy Haskell Java JavaScript Lisp Perl PHP Python Ruby Scala Scheme 显示基础的选择框 自定义数据并显示 您可以使用自定义数据格式，并通过简单地重新加载默认的数据和选择行为来显示数据。尝试输入 "j"，或者按下箭头按钮，即可得到一个项目列表。jQuery UI 自动完成 (Autocomplete) - 自定义数据并显示 (function) { var availableTags = ["ActionScript", "AppleScript", "Asp", "BASIC", "C", "C++", "Clojure", "COBOL", "ColdFusion", "Erlang", "Fortran", "Groovy", "Haskell", "Java", "JavaScript", "Lisp", "Perl", "PHP", "Python", "Ruby", "Scala", "Scheme"]; function split(val) { return val.split(/,/); } function extractLast(term) { return split(term).pop(); } \$ ("#tags") // 当选择一个项目时不离开文本域 .bind("keydown", function(event) { if (event.keyCode == \$.ui.keyCode.TAB && \$ (this).data("ui-autocomplete") .menu.active) { event.preventDefault(); } }) .autocomplete({ minLength: 0, source: function(request, response) { // 回到 autocomplete，但是提取最后的条目 response(\$.ui.autocomplete.filter(availableTags, extractLast(request.term))); }, focus: function() { // 防止在获得焦点时插入值 return false; }, select: function(event, ui) { var terms = split(this.value); // 移除当前输入 terms.pop(); // 添加被选项 terms.push(ui.item.value); // 添加占位符，在结尾添加逗号+空格 terms.push(""); return false; } }); // 编程语言: 多个值，远程 用法: 键入至少两个字符来获取鸟的名称。选择一个值，然后继续键入字符来添加其他的值。本实例演示如何使用 source 选项和一些事件来实现在一个单一的文本域输入多个自动完成的值。jQuery UI 自动完成 (Autocomplete) - 多个值，远程 ui-autocomplete-loading { background: white url(/try/jqueryui/ui-anim_basic_16x16.gif) right center no-repeat; } \$ (function() { function log(message) { \$ ("").text(message).prependTo("#log"); \$ ("#log").scrollTop(0); } \$ ("#birds").autocomplete({ source: function(request, response) { \$.ajax({ url: "try/jqueryui/search.php", dataType: "jsonp", data: { term: request.term, success: function(data) { response(data); } } }); }, minLength: 2, select: function(event, ui) { log("Selected: " + ui.item.value + " aka " + ui.item.id); } }); }); Birds: Result: 远程数据源 当您在文本域中键入字符时，Autocomplete 部件给出建议结果。在本实例中，当您在文本域中至少键入两个字符时，将显示相关鸟的名称。在本实例中，数据源是可返回 JSON 数据的服务器端脚本，通过一个简单的 source 选项来指定。另外，minLength 选项设置为 2，避免查询返回太多的结果，select 事件用于显示一些反馈。jQuery UI 自动完成 (Autocomplete) - 远程数据源 ui-autocomplete-loading { background: white url(/try/jqueryui/ui-anim_basic_16x16.gif) right center no-repeat; } \$ (function() { var cache = {}; \$ ("#birds").autocomplete({ minLength: 2, source: function(request, response) { var term = request.term; if (term in cache) { response(cache[term]); return; } \$.getJSON("search.php", request, function(data, status,

```
xhr ) { cache[ term ] = data; response( data ); } } } ); 鸟 : 可滚动的结果 当显示一个长列表的选项时 , 您可以简单地为 autocomplete 菜单设置 max-height 来防止菜单显示太长。 尝试键入 "a" 或 "s" 来获得一个可滚动的长列表的结果。 JQuery UI 自动完成 ( Autocomplete ) - 可滚动的结果 .ui-autocomplete-loading { background: white url(/try/jqueryui/ui-anim_basic_16x16.gif) right center no-repeat; }(function() { function log( message ) { $( "" ).text( message ).prependTo( "#log" ); $( "#log" ).attr( "scrollTop", 0 ); } $.ajax({ url: "/try/jqueryui/london.xml", dataType: "xml", success: function( xmlResponse ) { var data = $( "geoname", xmlResponse ).map(function() { return { value: $( "name", this ).text() + " ", " + ( $.trim( $( "countryName", this ).text() ) || "(unknown country" ), id: $( "geonameid", this ).text() ); } }).get(); $( "#birds" ).autocomplete({ source: data, minLength: 0, select: function( event, ui ) { log( ui.item ? "Selected: " + ui.item.value + " , geonameid: " + ui.item.id : "Nothing selected, input was " + this.value ); } } ); } }); London 匹配 : 结果 :
